Projects

Stock Market Demo + analytics

A JavaFX desktop application simulating a stock trading platform. The app fetches live market data from Yahoo Finance and Binance APIs, displays interactive line and OHLC candlestick charts with multiple time ranges, and provides a demo trading account with buy/sell orders, Stop Loss/Take Profit triggers, and portfolio management. Includes an AI-powered candlestick pattern analyzer for market trend prediction and automatic PDF tax report (PIT-8C) generation. Built with Java 17, JavaFX, Maven, and Apache PDFBox.

Stack: Java 17 ■ Framework: JavaFX 21, Apache ■ Tools: Git, Maven ■ Agile methodology: Scrum
